

## Invitation

# Full power ahead! How to stimulate a global decarbonisation of mobility

In order to achieve the targets of the Paris climate agreement, ambitious action is needed globally to reduce emissions from the transport sector. At the same time, transport demand is expected to rise steadily in view of continuous urbanisation and motorisation. A global mobility transformation is necessary and the international community needs to provide the necessary framework conditions.

To produce these solutions for international politics and diplomacy, the Federal Foreign Office has commissioned the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH jointly with Agora Verkehrswende and the World Economic Forum to carry out

### T4<2° - Transport for a below two degrees future The Global Foresight Project on Transforming Mobility by mid-century
